

**METAFORCE TOTAL LEVEL
REVENUE EXPLANATION**

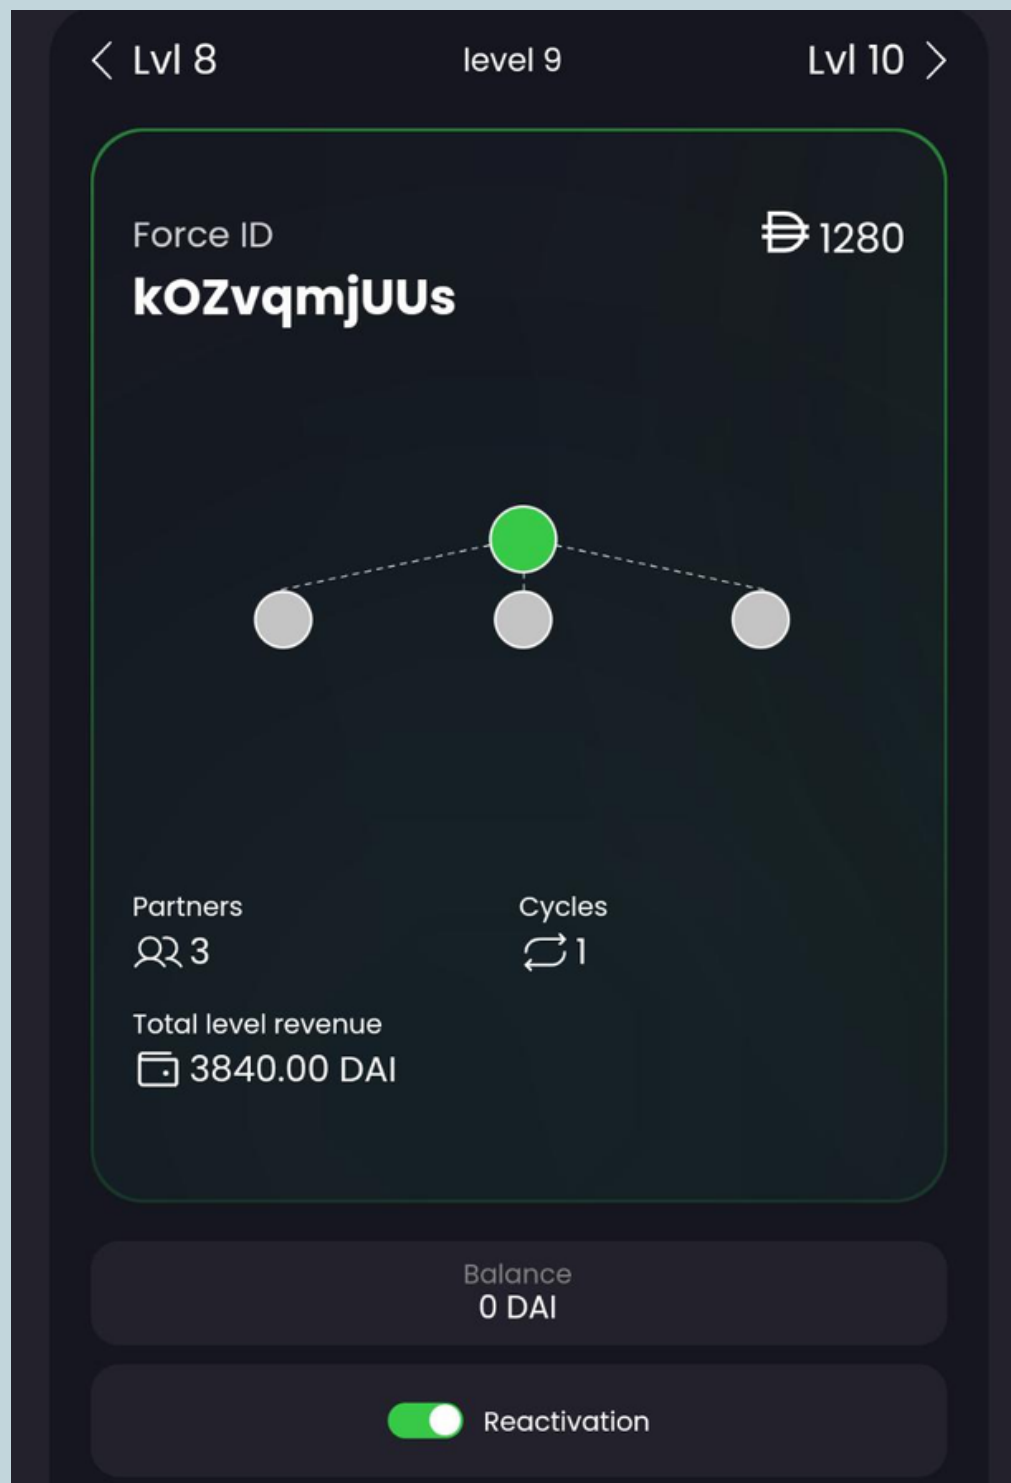

TOTAL LEVEL REVENUE

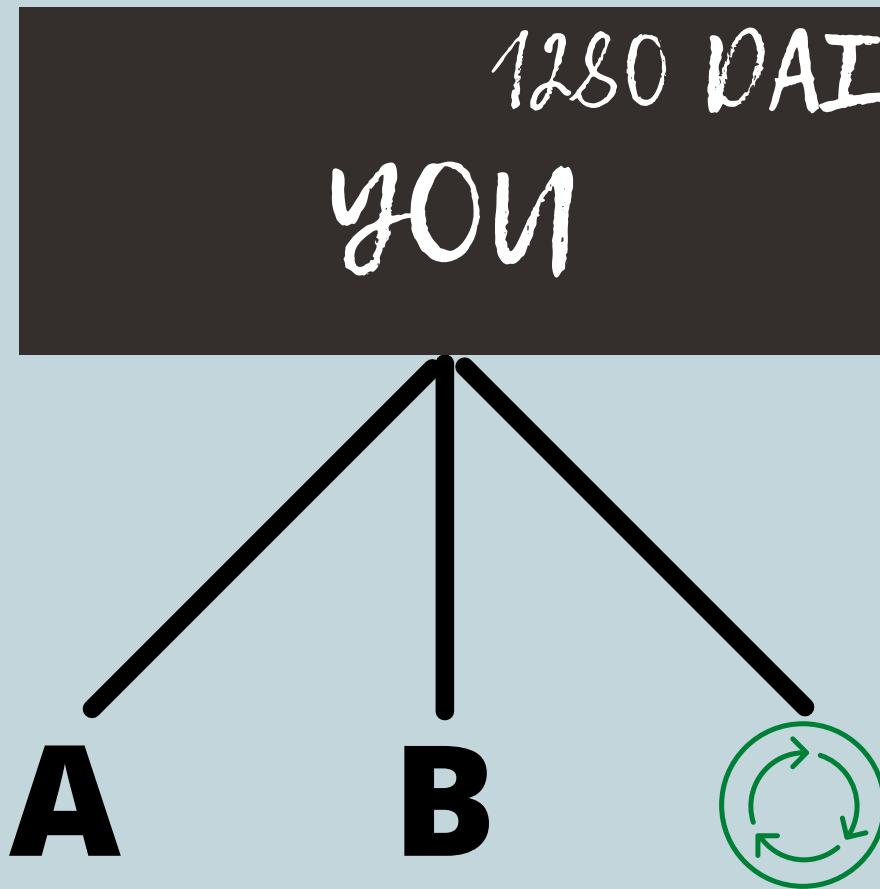

Total revenue you see is the sum of all circles in that particular level with all the cycles.

For example, lets take level 9
TOTAL LEVEL REVENUE = 3840 DAI
Which means in cycle 1
Circle 1 = 1280 DAI
Circle 2 = 1280 DAI
Circle 3 = 1280 DAI
So, total 3840 DAI

In cycle 2, since no circle got filled, total 3840 DAI remains the same.

From this, we can conclude that,
TOTAL LEVEL REVENUE is the sum of all circle's from every level.

But, what you get in your wallet is different.

You get paid only for first two circle's

That is, 2 circle = $1280 * 2 = 2560$ DAI

and the third circle goes for recycling incase of S3 matrix.

Recycling is nothing but, the amount will be used for opening the cycle again.

THANK YOU
